

# Jubo

## Better senior care starts here.

Staffing shortages, antiquated systems, and a lack of time and resources are increasingly causing strain on caregivers. That's why we've developed solutions to help caregivers overcome those challenges. In North America, we currently offer VitalLink, a vitals monitoring solution, and FamilyLine, a resident and family engagement solution.

VitalLink automates the vital sign monitoring process using Bluetooth-enabled devices that instantly record vital sign measurements and securely sync with PointClickCare®, providing caregivers with a holistic view of their resident's health.

FamilyLine provides caregivers with confidence, knowing that their senior residents are receiving the care, connection, and support they deserve, including time with their loved ones. FamilyLine integrates securely with PointClickCare® resident records, empowering families to schedule in-person and virtual visits and view their loved one's health summary, easing the administrative strain on care teams.

## About Us

Founded in 2018, Jubo Health Technologies is a leading SaaS solution provider for senior care in North America and Asia Pacific, helping care teams ensure quality and compliance, improve staff workflow, and deliver exceptional care with fewer resources.

Jubo's global product line includes electronic health records, vitals management, visitation scheduling, family communication, wound care, and fall detection. In North America, Jubo is an approved PointClickCare® partner, the leading cloud-based software vendor for the senior care market.
